## POSTMODERN IMPERIALISM: GEOPOLITICS AND THE GREAT GAMES

Clarity Press. Paperback. Book Condition: new. BRAND NEW, Postmodern Imperialism: Geopolitics and the Great Games, Eric Walberg, The game motif is useful as a metaphor for the broader rivalry between nations and economic systems with the rise of imperialism and the pursuit of world power. This game has gone through two major transformations since the days of Russian-British rivalry, with the rise first of Communism and then of Islam as world forces opposing imperialism. The main themes of "Postmodern Imperialism: Geopolitics and the Great Games" include: US imperial strategy as an outgrowth of British imperialism, and its transformation following the collapse of the Soviet Union; the significance of the creation of Israel with respect to the imperial project; the repositioning of Russia in world politics after the collapse of the Soviet Union; the emerging role of China and Iran in Eurasia; and, the emerging opposition to the US and NATO. As the critical literature on NATO, the new Russia, and the Middle East is fragmented, this work brings these elements together in historical perspective with an understanding from the Arab/ Muslim world's point of view, as it is the main focus of all the "Great Games". It strives to bridge the gap between Western, Russian and Middle Eastern readers with an analysis that is accessible and appeals to all critical thinkers, and at the same time provides the tools to analyse the current game as it evolves. The Great Games of yore - Britain vs. Russia and their empires in the 19th century, and the US vs. the Soviet Union in the 20th century - no longer translate merely as the US vs. Russia or Russia/China. A major new player is a collective one, NATO, which today is as vital as the emperor's clothes to justify the global reach of...
